1. Introduction

- With the emergence of the big data, new jobs have appeared demanding new sets of skills and expertise for extracting value from data (Axis Talent, 2020):
- Business Analysts (BA)
- Data Analysts (DA)
- Data Architects (DR)
- Data Engineers (DE)
- Data Scientists (DS)
- **Which one is the most valued in the Mexican labor market currently?**

2. Methodology

Research question:

Which data job category has the highest salary in the Mexican labor market in February 2023 according to the OCC website?

Based on Rollins' Foundational Methodology for Data Science (2015).

3. Data Jobs Demand Analysis...

- 258 data jobs found.

- What is the most demanded data job?
Data Analyst.

Figure 1. Proportion of vacancies for each data job category in Mexico in February 2023 (own elaboration).

...Data Jobs Demand Analysis...

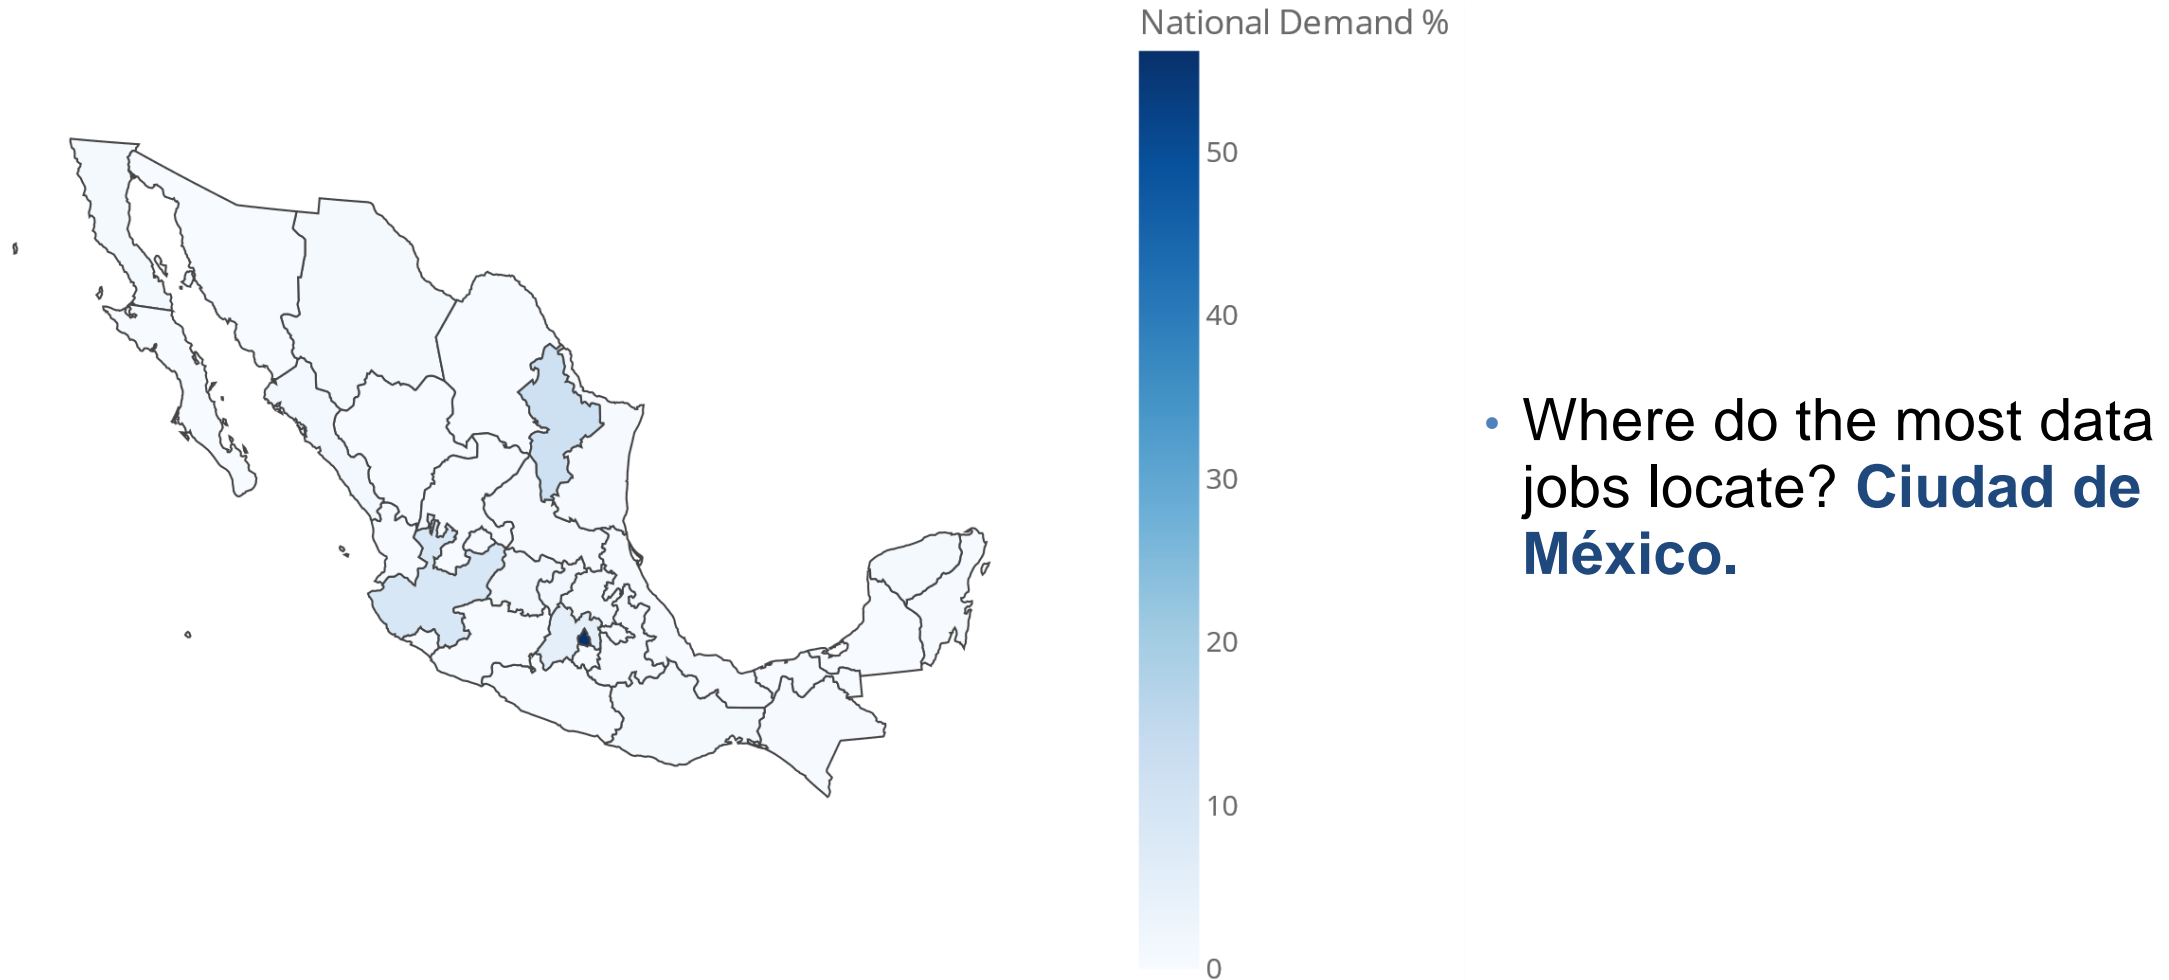

Figure 2. Data jobs demand per state in Mexico in February 2023 (own elaboration).

...Data Jobs Demand Analysis...

- What data job is the most demanded across the locations? **Data Analysts, and Data Scientists.**

Figure 3. Data jobs demand per category and location in February 2023 (own elaboration).

...Data Jobs Demand Analysis...

- What companies demand the most jobs in data?

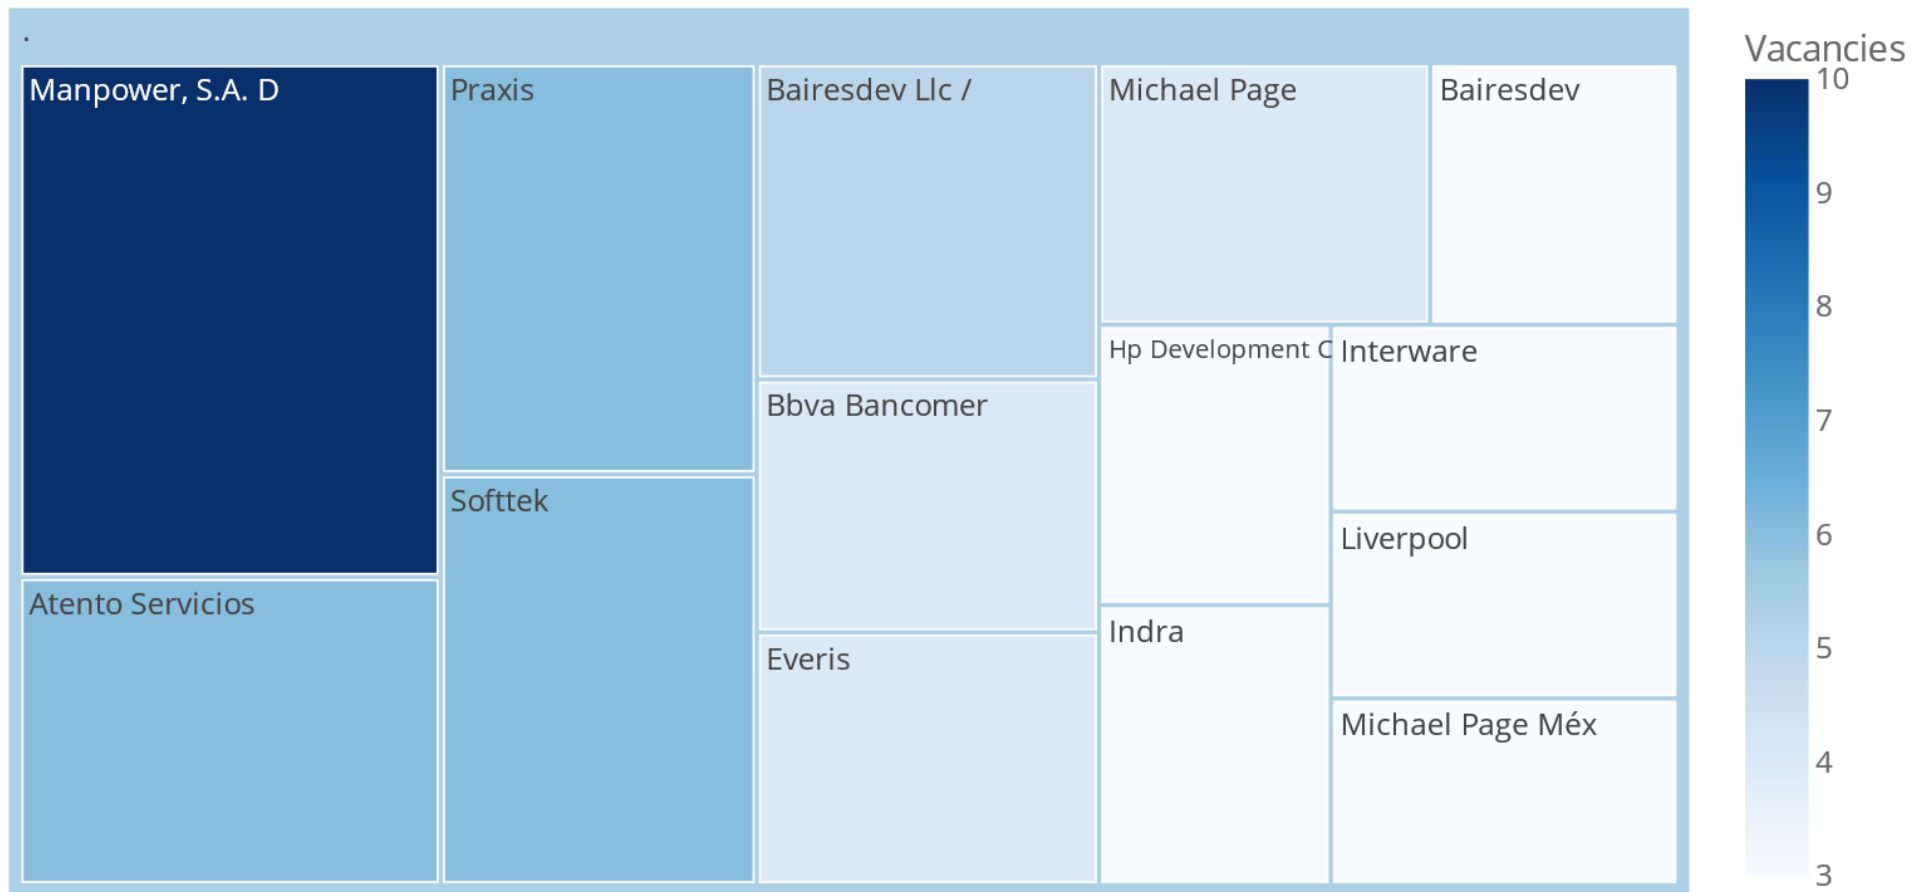

Figure 4. Top 15 companies with the greater demand of data jobs in Mexico in February 2023 (own elaboration).

...Data Jobs Demand Analysis...

- How is the data jobs demand per company? **Data Scientist and Data Architect positions are more likely to be found in tech companies.**

Figure 5. Data jobs demand per category and company (top 30) in February 2023 (own elaboration).

...Data Jobs Demand Analysis

- Where do companies demanding data jobs locate? **Mostly in Ciudad de México, Nuevo León, and Jalisco.**

Figure 6. Top 30 companies demanding data jobs per location in February 2023 (own elaboration).

4. Salary Analysis...

- Sample of 105 jobs.
- For all data jobs:
Average salary of **\$35,757 MXN per month.**
- Non normal distribution

Figure 7. Histogram of salary distribution of the data jobs in Mexico in February 2023 (own elaboration).

...Salary Analysis...

- Which data job category has the highest average salary?
Data Architect

Data Job Category	Mean Monthly Salary (MXN)	Median Monthly Salary (MXN)
Data Architect	\$86,562	\$75,000
Data Engineer	\$49,567	\$50,000
Data Scientist	\$39,687	\$39,750
Business Analyst	\$32,415	\$32,000
Data Analyst	\$21,240	\$16,750

Figure 8. Box plot of salary distributions for each data job category in Mexico in February 2023 (own elaboration).

...Salary Analysis...

- Where are the highest salaries for data jobs?
Depends on the data job.
However, Data Architects are better paid in Ciudad de México.

Figure 9. Average salaries by data job category and location in Mexico in February 2023 (own elaboration).

...Salary Analysis...

- What companies offer the highest salaries for data jobs? **Especialistas en Talento.**

Figure 10. Top 20 companies with the highest average salaries for data jobs in Mexico in February 2023 (own elaboration).

...Salary Analysis

- What companies offer the highest salaries for data jobs per data job category?

Figure 11. Top 30 companies with the highest average salaries by data job category in Mexico in February 2023 (own elaboration).

5. Conclusions...

- **Data Architect** is the data job category with the **highest salary** in the Mexican labor market in February 2023 according to the OCC website.
- **Data Analyst** is the data job category **more demanded** in the current Mexican labor market and across the different Mexican states, even though it was also the one with the **lowest salary**.
- **Ciudad de México** is the place where it is possible to find the **highest jobs demand** and the **highest salaries**.

...Conclusions...

- **Data Architect** and **Data Scientist** positions are **concentrated** in Ciudad de México, Nuevo León, and Jalisco, and are most likely to be found in **recruitment agencies and tech consulting firms**.
- **Data Analyst, Data Scientist, and Data Engineer** positions are more demanded **across different type of organizations and locations**.
- **Manpower, Atento Servicios, Praxis** and **Softek** exhibited the **highest demand** of data jobs positions; while **Especialistas en Talento, Zemsania México, Resources Connection México, Zegovia RH, and Reclutamiento en Tecnología** offered the **highest salaries**.

... Conclusions

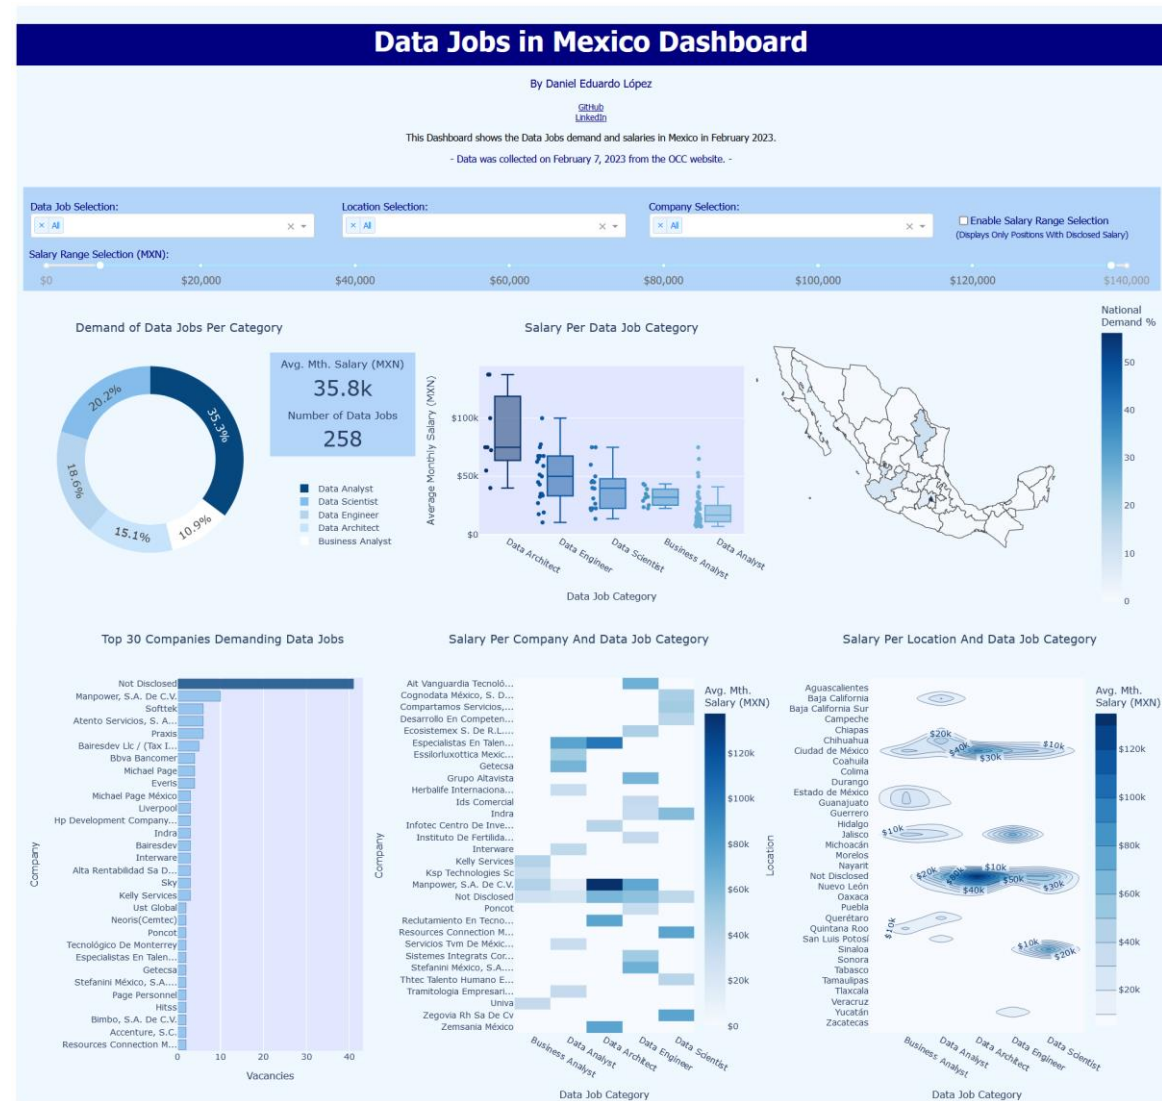

- This study had **limitations**:
 - Only used OCC as source of information during a very short period of time (just 07 February 2023).
 - Very few salary observations were retrieved for Data Architect and Business Analyst positions.
 - Collected data mostly correspond to Ciudad de México, Estado de México, Nuevo León and Jalisco.
 - No distinction was made among entry level, middle and senior positions.
- **Future perspectives**:
 - Gather data from more job websites.
 - Retrieve information for a longer time span.
 - Collect more salary observations for Data Architect and Data Scientist positions.
 - Collect more salary data for other Mexican states.
 - Make a distinction among entry level, middle and senior positions.
